

@ Your IT Services

## You have a vision we have **S**olutions

Building websites & software has to be done with meaning, substance & intelligence. It has to be affordable but not cheap, fast but not resource hungry, smart but not too complex.

Our teams engage with customers over phones, email, IM & visits to leave nothing unexamined. We will advice on the most suitable technology, provide low pricing from India & ensure local support.

**SUNCYB Solutions** as an IT Service company specializes in designing, developing, implementing and supporting web & software systems for a wide network of customers throughout India, Canada and USA.

### History

SUNCYB Solutions had started with a humble background with a drive to challenge the status quo. We are engaged in providing bespoke software development services that are sourced to bring 'value' to our customers. We provide IT services in a dynamic environment, where business and technology strategies are conveniently converged.

SUNCYB Solutions was established in 2009. The major part of SUNCYB Solutions business covers mainly all the service industry. Therefore, SUNCYB Solutions has a high level of financial stability and capability to develop new directions of its business. Since its inception, the company has entered the market of software outsourcing services. In a year, it has successfully completed more than 10 projects for partners from the USA, Australia, Canada and India. We are exploring new horizons and successfully grasping opportunities that drive in our way.

### Our Mission

Our mission is to always provide cost-effective, creative and powerful quality solutions that target your goals.

## Our Services

At SUNCYB Solutions, we are striving to understand changing customer needs. We want to make our customers' lives easier by simply making technology usable.

We are proud to have solid Information Systems Professionals, who with the help of world class tools and equipment, study, design, develop, enhance, customize, implement, maintain and support various aspects of Information Technology.

We have the expertise and experience to help you cut costs significantly without impacting product quality or delivery schedules.

SUNCYB Solutions is committed to provide ever increasing levels of customer satisfaction by offering the highest quality in the following areas:

- Web Designing & Programming
- E-Business Solution
- IT and Internet Consulting
- Custom Build Software Applications
- Web based Applications & Solutions
- Desktop Databases and Programming
- Solution to Database Administration
- Email & Hosting Services

### Custom Application Development

Custom Application development outsourcing helps organizations adapt to the rapid technology advancements and evolving business processes and fulfill their need for newer customized solutions with embedded business processes, rules and logic.

### Web Application Development

Application development has undergone a transition over the last few years, with the migration of applications from traditional client/server designs to the Internet. This dynamic nature of the web as a convenient transaction vehicle for business transactions has made fast-paced development of solutions - paramount. The advent of technologies such as ASP & Microsoft .NET, PHP Development, Java/J2EE, Cold Fusion etc allows us to convert business processes and legacy application into web enable applications.

### Desktop Application

Desktop Applications are robust, rich-client applications that are compiled and run using the processing power of an individual user's desktop computer. SUNCYB Solutions has expertise in a wide variety of the latest programming language tools and platforms for client-server application. Structured methodologies and proven IT processes helps to reduce complexity, risks and costs associated with client/server development. We will help you develop customized software applications and assist you thorough out the entire software development Life Cycle, including project management, systems analysis and design, software development, implementation and training.

## Web Application Maintenance

In today's fast track IT environment, it is not unusual to believe that about 75-80% of IT budgets are spent on Application management / maintenance. Enterprises have significant investments in IT assets to execute their business and derive appropriate returns. These investments are made over a period of time and spread across the technology spectrum; spanning from legacy platforms to client-server system to more contemporary multi-tier browser-based systems. Legacy Application and Systems are the operations and knowledge backbone of client organizations; they are non-negotiable and crucial to business survival. Market research estimates show that more than 70% of corporate data still resides on legacy systems. Hence the successful management of legacy systems to meet evolving business needs is the major challenge today. This can be achieved through a comprehensive application portfolio analysis of existing applications.

SUNCYB Solutions offers maintenance services of Offshore Applications Developed in various platforms and frameworks. We have over time evolved and fine tuned a tested process for offering this extremely critical and significant service. Our Services includes:

## Application Maintenance

• Application Maintenance • Application Support • Helpdesk

## Product Development

SUNCYB Solutions team provides support to clients from the stage of concept to development, to support, to promotions, end to end support to clients worldwide enabling them to achieve over 50% savings from their business plans.

## Promotion of the product

For a product company, success depends on constant, unprecedented innovation in technologies, products and business models. Reduce the time to market the product. On knowing what increasingly sophisticated customers want and expect on collaborating with partners to take advantage of fast-moving opportunities.

SUNCYB Solutions specializes in defining and implementing prudent offshore outsourcing strategies for software product companies enabling them to achieve sustainable differential advantage and making their business plans feasible for worldwide markets.

The team at SUNCYB Solutions, acting as your own design and development teams, is constituted with high quality resources possessing functional and required technical competencies. The challenge for companies that build and market application products is to translate their technology leadership and vision to features and functionality that bring value to end- customers.

## Our Expertise

The guiding philosophy for SUNCYB Solution's success is passion for Technology and understanding customer's needs. Our technology-agnostic approach allows us to focus on solutions and provide the apt technology to cater to customers business needs. It is very important that our developers are able to understand and implement new technologies and programming languages in a fast and successful manner to meet the customer's requirements.
